

Standard hand film

Description

LLDPE multi-layer stretch film, manufactured with the use of the CAST film extrusion technology, perfect for protection and transportation of goods.

Features

The standard stretch hand film presents various advantages in terms of usage: it is easy to apply, it wraps and protects in a simple and effective way loads bundled on pallets, as well as individual items of large overall dimensions.

Our stretch hand film has a good resistance to perforation and guarantees stability of the pallet also by low thicknesses.
