

FFS film and tube for bags

Description

Co-extruded LDPE FFS film, tube foil or gusseted tube for industrial bags.

Features

The FFS film and tube guarantee a high puncture and tearing resistance. Among the features of these materials, to note in particular the optimal levels of sealability and hot tack. These products can be customised according to the specific requests of the customer, for example as far as the optical properties are concerned.

Furthermore, cutting, pre-cutting and sealing can be personalized according to the needs of the client.

Product range
